

*If you've always dreamed*

*of owning a log home...*

we can help build it

## *We Can Help Build It*

At North River Log Homes, we create beautiful dream homes and charming getaway cabins for people who want to recapture the traditional warmth and elegance so often lost in today's modern buildings.

## *Specialized Expertise*

Our machined log homes are custom designed and pre-built on our site in the beautiful North Thompson Valley of British Columbia. We work with engineers, licensed log home builders and other contractors to ensure each home meets current building code requirements.

## *Building Style & Technique*

We build primarily with beautiful blue stained lodge pole pine, which we monitor carefully for moisture to ensure the least amount of settling or checking.

We offer homes in several profiles for a variety of appearances. Our 'D' profiles give flat inside walls, making for easy cleanup, picture hanging, and cupboard installation. For traditionalists who prefer a true log look, we offer full round machined logs.

Our homes assemble quickly and accurately using:

A double tongue and groove stacking system

Insulated foam tape

A fully beveled notch

## *Small Cabins & Outbuildings*

At a fraction of the size and cost of our larger log profiles, our 4"x 6" D log is quickly becoming popular with existing log home and resort owners who want affordable smaller structures such as:

Garden sheds

Children's bunkhouses or playhouses

Cabins

Generator sheds

Laundry rooms

Shower houses and outhouses

Concession stands

These buildings are notched and assembled using the same tried and true construction methods of our larger log homes.

We are an owner-operated company located in Darfield, B.C., just 90 kms north of Kamloops on Highway #5. We ship log home packages and log home components throughout B.C., Alberta, the continental U.S. and overseas.
